

Eagle Plaque

Materials:

- 14 jumbo craft sticks
(12 whole sticks and 2 5" sticks)
- Gummed picture eyelet
- 10 mm paste-on eye
- Lightweight cardboard
- Index card
- Paint (white, yellow, tan, brown)
- Tape
- Glue
- Mod Podge

Wings: Working on waxed paper, glue the 2 5" sticks to a whole stick, edge to edge, as shown in fig. 1. Glue and tape the edges of 2 more whole sticks to the edges of the 5" sticks, leaving about a 1" space between them in the center. Glue a 2" x 4" piece of cardboard on top of these 5 sticks as shown. Glue and tape 2 more sticks to each side of the wings, with the end of each stick extending 1" past the stick below it. This is the back side of the wings. When dry, remove the wings from the waxed paper and turn over. Use the feather pattern to cut 6 feathers from an index card and glue them to the lower 2 sticks of the wings. Glue the eye to the head.

Body and Tail: Glue a whole stick on top of 2 other whole sticks with the upper ends of the 2 sticks touching and the lower ends spreading out past the single (top) stick as shown in fig. 2.

Let dry, then glue the body to the center front of the wings with the top of the body extending about 1/2" above the center part of the wings. Using the patterns, cut the head and 2 feet from cardboard. Glue the head to the top of the body. The feet are glued to the sides of the lower part of the body. Attach the picture eyelet to the back of the wings and apply Mod Podge. Let the gloss dry and paint the head white, the beak and feet yellow, the body tan and wings and tail brown.
