

Great Gifts

All you need is imagination to make these presents perfect anytime of the year.

Give this handmade gift that carries keys and coins in one handy package.

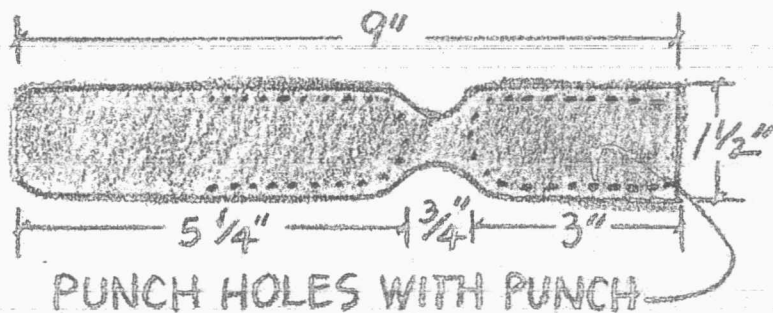

Materials: flexible leather, 9 inches wide by 1½ inches long; a strip of 18-inch-long lacing; a split key ring (available at craft stores); two pieces ¾-inch Velcro fasteners; contact cement; leather hole punch; scissors; lacing needle.

Instructions: Cut a piece of leather as shown in the drawing. One side should be 3 inches long, the other should be 5½. Punch the holes about ¼ inch apart around the 3-inch side, except for the end. Punch matching holes on the other side.

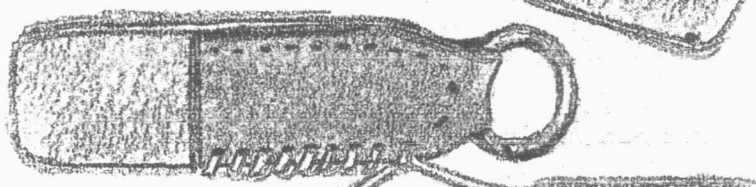

Slip the key ring over the leather. Fold over the 3-inch side so the holes line up. Lace the pocket and tie off with a square knot.

Using contact cement, glue one piece of Velcro fastener to the part of the leather without any holes. Glue the other piece onto the top side of the coin pocket.
