

## April – Waterways Of The USA

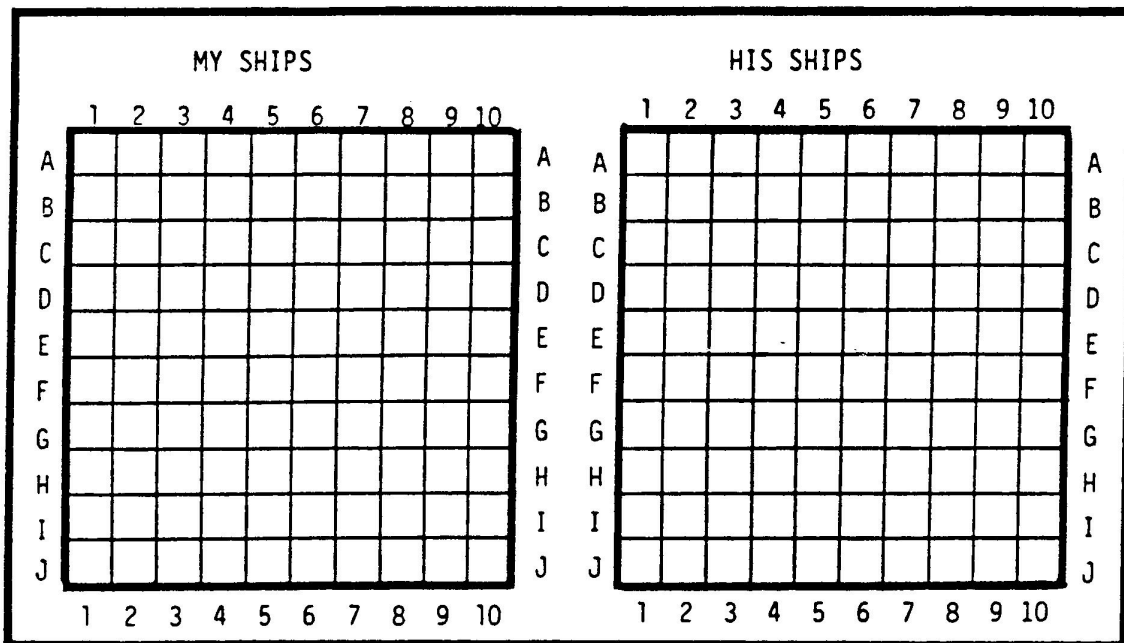

Graph Paper “Battleship”

(played the same as “Battleship” only using graph paper and pencil)

Number of Players 2

Game set up:

Use photocopies of the game board shown below or set up in same manner as shown. Each player should have a game board.

Each player set up the following ships on his board by drawing a line around the set of squares:

One Man-O-War

5 squares long

One Schooner

3 squares long

One Frigate

4 squares long

One Dinghy

2 squares long

One Clipper Ship

3 squares long

Each player takes turns in calling out locations by using both the numbers and the letter to identify the square. The opposite player calls out a hit or miss. The player calling out the locations then marks his graph paper with an “X” for hit or “O” for miss. Players take turns calling out locations. The winner is the player who has sunk all of his opponent’s ships first.
